We must confirm your mobile phone number. Please enter the 4-digit text you just received.

RESEND CODE

THIS FIELD IS REQUIRED

OK

Overview of issue

During the pre-registration process, a pre-populated phone number will be listed under the “mobile phone” field. This pre-populated phone number may be listed as a landline based on what was provided in the prior system, which cannot receive verification codes.

If you click “OK” and then realize that you cannot receive a code on the listed phone number, you will need to follow the steps below to modify the phone number and complete your registration.

CRITICAL! What is happening, is that you get to this page and then are **UNABLE** to write over the phone number. [Please see below to fix this.](#)

Mobile phone
+1 [REDACTED] 2270456

Check here to indicate that you have read and agree to the **TERMS AND CONDITIONS** of this agreement.

OK

QUICK FIX: Reload/refresh the page or re-click the link from the email. Then you will be able to write over the phone number with your mobile phone to complete registration.

Note: this phone number is only used for authorization and the pre-populated phone number will remain on file unless changed within the platform after completing registration.
